***HOLLYHOCK (Kunderd) A Striking Novelty of Merit***

Color, White, with just enough Cream to give character. Lower Petals blotched with violet-red. The large, round, ruffled flowers are apt to be top-heavy, and the spikes should always be cut as soon as the first flower opens, unless they are securely staked. Wonderful as an exhibition cut flower. We won first prize on this variety at the A. G. S. Show in Rochester, 1925, for "Best White, with Marking." HOLLYHOCK never fails to attract attention and has proved a sensation wherever shown. You will want to get a start this year. (For prices, see next page.)

## VEILCHENBLAU

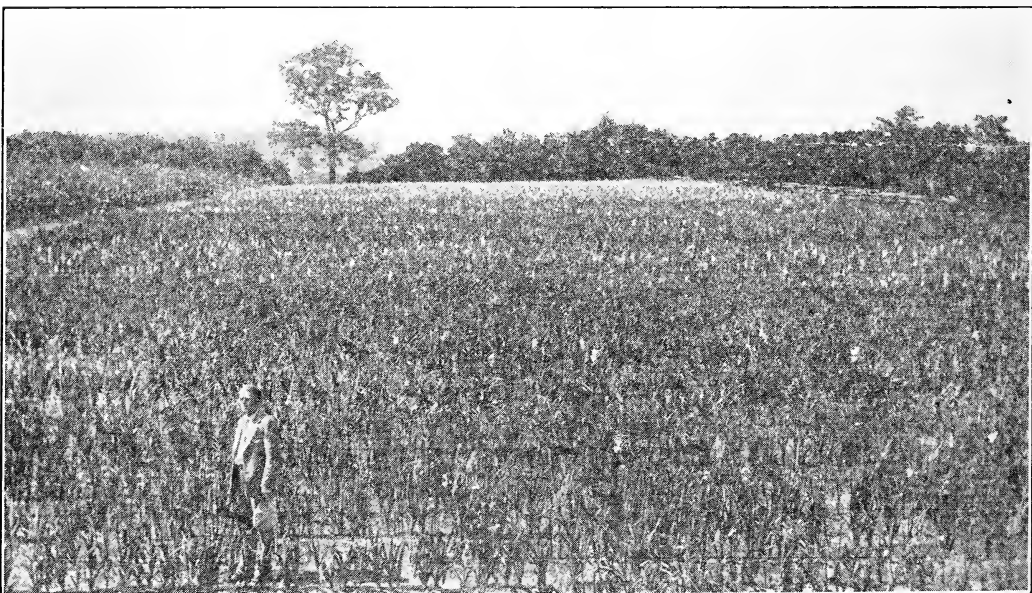

### *The Leading Blue Gladiolus*

A Pfizter production. The first large, vigorous Violet-Blue Gladiolus. Stands supreme in its color class. Has a dark blotch on the lower petals, which adds to the beauty of the flower. Many call it the Iris-like Gladiolus on account of the color resemblance. We won first prize on this variety at the Iowa State Fair, Des Moines, 1925 and 1926, for "Best three spikes any Blue Variety." Also first prize at Michigan Gladiolus Society Show, East Lansing, 1926, for "Best spike any Blue Variety"—Class No. 8. The sensation of the season's Shows wherever shown, and deserving of a place in every collection. A most profitable seller for the grower. The demand is enormous and stocks are limited, as it is not in general cultivation. We are pleased to be able to offer large bulbs at \$2.00 per bulb, and plump hand-picked Bulblets at \$12.50 per 100.
